### About us:

For 35 years, the Kreisau-Initiative has been actively promoting exchange among young people and multipliers in Europe and beyond. In doing so, it builds a bridge between remembrance work and current development policy goals in the field of non-formal education.

This project takes place on the occasion of the 20th anniversary of the Model International Criminal Court (MICC) – a participatory educational program that has successfully engaged young people from Europe and around the world in simulated court trials of international criminal cases since 2005.

The anniversary year offers an opportunity to reflect on the program's impact, address current challenges, and continue developing human rights education with a forward-looking perspective.

### Project overview:

The **MICC Experts Training (June 13–19, 2025)** brings together experienced professionals and advanced students in the fields of law, international relations, political science, and journalism who are interested in deepening their understanding of international criminal justice and gaining practical skills in simulated legal proceedings.

This gathering and networking opportunity strengthens their role as active members of civil society and provides opportunities to broaden their network to decision-makers from legal fields, politics, civil society, and academia. The focus is on reflecting and discussion international criminal law, combining it with climate- and human rights-related topics, including ecocide, as well as strengthening the MICC's connection to the Global South.
